

SenecaCotto Metallic

The SenecaCotto Metallic collection consists of four colors in the standard brick size of 2 5/8" x 8" in a very handcrafted, worn and weathered surface: Aged Silver, Brushed Silver, Aged Bronze, Brushed Bronze.

From America, Ohio craftsmen have developed the most unique real clay terracotta. Originally developed as an unglazed brick-like product primarily for floors, SenecaCotto is now available in four distinct metallic glazes. Only from hands-on craftsmanship, combined with multiple layers of hand-applied glazes, can such authenticity, character, charm and unique originality emerge.

Manufactured in the standard 2 5/8" x 8" brick size, with other standard SenecaCotto sizes available as custom order, SenecaCotto has the worn and weathered texture found only in a truly handmade product made centuries ago. See installation and maintenance instructions available from your Seneca Tiles distributor. Additional samples are necessary to see the full range.
